1. General information

AltaLink, L.P. (AltaLink) was formed under the laws of the Province of Alberta in Canada on July 3, 2001, to own and operate regulated transmission assets in Alberta. AltaLink's head office is located at 2611 - 3rd Avenue SE, Calgary, Alberta, T2A 7W7. AltaLink has one limited partner, AltaLink Investments, L.P., and is managed by AltaLink Management Ltd. (the General Partner). While the General Partner may hold legal title to the assets, AltaLink is the beneficial owner and assumes all risks and rewards of the assets.

On December 1, 2014, BHE Canada Holdings Corporation became the sole owner of AltaLink by indirectly acquiring 100 percent of AltaLink.

These consolidated condensed interim financial statements (the consolidated financial statements) include the accounts of AltaLink and its subsidiary entities, PiikaniLink, L.P. (PLP) and KainaiLink, L.P. (KLP) (collectively, the Partnership). For the purposes of consolidation, intercompany accounts and transactions have been eliminated.

The Partnership is regulated by the Alberta Utilities Commission (AUC), pursuant to the Electric Utilities Act (Alberta) (EUA), the Public Utilities Act (Alberta), the Alberta Utilities Commission Act (Alberta), and the Hydro and Electric Energy Act (Alberta). These statutes and their respective regulations cover matters such as tariffs, construction, operations, and financing. The Alberta Electric System Operator (AESO) administers the transmission of all electrical energy through the Alberta Interconnected Electric System in the Province of Alberta.

During the nine months ended September 30, 2024 and 2023, the Partnership operated solely in one reportable geographical and business segment.

2. Basis of preparation

Statement of compliance

These consolidated financial statements have been prepared in accordance with International Accounting Standard 34 – *Interim Financial Reporting*. They should be read in conjunction with the Partnership's most recent annual audited consolidated financial statements as at and for the year ended December 31, 2023.

The Partnership has consistently applied the same material accounting policies in these consolidated financial statements as compared to its 2023 annual audited consolidated financial statements.

Certain of the material accounting policies adopted to prepare these consolidated financial statements are set out below. The consolidated financial statements reflect the financial position and financial performance of the Partnership and do not include all the assets, liabilities, revenues and expenses of AltaLink Investments, L.P. or AltaLink Management Ltd.

These consolidated financial statements were approved for issue by the Board of Directors on October 28, 2024.

Basis of measurement

These consolidated financial statements have been prepared on a going concern and historical cost basis except for employee retirement benefits liabilities and cash, which are measured at fair value.

Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is the Partnership's functional currency.

Use of estimates and judgement

The preparation of these consolidated financial statements require management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Judgements made by management that have significant effects on the consolidated financial statements and estimates with a significant risk of material adjustment in the next year are disclosed, where applicable, in the relevant notes to the consolidated financial statements.

Accounting policies are selected and applied in a manner which ensures the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring the substance of the underlying transactions or other events is reported.

As a regulated utility, the Partnership records certain amounts at estimated values until these amounts are finalized. The Partnership bases its estimates and judgements on historical experience, including experience with regulatory processes, current conditions and various other reasonable assumptions. These factors form the basis for making judgements about the carrying values of assets and liabilities. They are also the basis for identifying and assessing the Partnership's accounting treatment with respect to commitments and contingencies. Significant estimates and judgements include:

- Expected regulatory decisions on matters that may impact revenue;
- The recovery and settlement of financial assets and liabilities related to regulated activities, including the collection of the recovery of future income taxes and prudence reviews of capital additions by the AUC;
- Key economic assumptions used in cash flow projections to assess goodwill for impairment;
- The estimated useful lives of assets;
- The recoverability of tangible and intangible assets, including estimates of future costs to retire physical assets or the recoverability of costs associated with direct assigned projects that have been cancelled or delayed in the regulatory process; and
- The accruals for capital projects.

The Partnership applies changes in estimates prospectively as they result from new information. To the extent that a change in accounting estimate gives rise to changes in assets or liabilities, or relates to an item of equity, the Partnership adjusts the carrying amount of the related asset or liability in the period of the change.

Change in accounting estimate

In 2024, the Partnership implemented a change in accounting estimate on a prospective basis related to the costs of site preparation for capital replacement projects. On June 19, 2024, the AUC approved the collection of these costs over the average useful lives of the related replacement assets starting January 1, 2024. During the nine months ended September 30, 2024, the Partnership capitalized \$24.7 million of site preparation costs for replacement projects.

3. Summary of material accounting policy information

The following is a summary of certain of the material accounting policy information. For a complete summary of material accounting policy information, please refer to note 3 in the Partnership's 2023 annual audited consolidated financial statements.

Regulation of transmission tariffs

The Partnership operates under cost-of-service regulation in accordance with the EUA. The AUC must provide the Partnership with a reasonable opportunity to recover its prudently incurred and forecasted costs, including operating expenses, depreciation, cost of debt, taxes associated with investment, and a fair return on investment. Fair return is based on return on rate base and allowance for funds used during construction (AFUDC) for projects included in construction work-in-progress (CWIP). The Partnership applies for transmission tariffs based on forecasted costs-of-service. The Partnership's transmission tariffs are not dependent on the price or volume of electricity transported through its transmission system. Once approved, the transmission tariffs are not adjusted if actual costs-of-service differ from forecast, except for certain prescribed costs for which deferral and reserve accounts are established within the transmission tariffs. The annual transmission tariff is received from the AESO in equal monthly installments and is included in accounts receivable as it falls due.

All tariff adjustments arising from deferral or reserve accounts relate to services provided to the AESO during the reporting periods, and settlement of these accounts with the AESO is not contingent on providing future services. If, in management's judgement, a reasonable estimate can be made of the impact future regulatory decisions may have on the current period's consolidated financial statements, such an estimate will be recorded in the current period. When the AUC issues a decision affecting the consolidated financial statements of a prior period, the final effects of the decision are recorded in the period in which the decision is issued.

Revenue recognition

Operations revenue from regulated activities represent the inflow of economic benefits earned during the period arising in the ordinary course of the Partnership's operating activities. The Partnership has a single performance obligation to stand ready to provide electrical transmission services through its transmission infrastructure as directed by the AUC. The return earned by the Partnership is based on tariffs approved by the AUC and is subject to change. Operations revenue is recognized on an accrual basis in accordance with tariffs approved by the AUC and based on the value of consideration expected to be received by the Partnership. The Partnership does not recognize revenue for any portion of tariffs received but not earned. Unearned tariffs are classified as financial liabilities related to regulated activities or deferred revenue.

Revenue for the recovery of deemed future income taxes is accrued based on the underlying right of the Partnership to earn an after-tax rate of return.

Funds approved by the AUC and provided by the AESO to pay for salvage costs where there is no asset replacement are deferred and released into revenue from operations when the associated salvage activities are performed and costs are incurred.

Other revenue represents revenue received from third parties and includes, but is not limited to, amortization of third party contributions, cost recoveries for services provided to other utilities, and rental income. Third party contributions are recorded as deferred revenue when capital funds are expended and recognized into other revenue over the useful lives of the associated assets. Cost recovery revenue is recognized on an accrual basis as the costs are incurred. Rental income from third parties is recognized on a straight-line basis over the contract term.

Financial assets and liabilities related to regulated activities

The regulatory and legal rights and obligations under which the Partnership operates, assign the Partnership the right to bill and collect financial assets related to regulated activities from the AESO. The AESO is the Partnership's single counterparty for regulated activities and amounts billed to it by the Partnership are based on specific amounts and timing approved by the AUC. There is no future performance required by the Partnership to recover these amounts. Long-term amounts due from the AESO earn a regulatory return and are discounted at a market rate of interest.

Financial assets are reviewed for impairment every reporting period. The carrying amounts of financial assets are net of any disallowances or impairments recognized for any identified lifetime expected credit losses. Expected credit losses are a probability-weighted estimate of the present value of expected cash shortfalls over the expected life of the financial asset, based on the Partnership's historical experience and forward-looking information.

The regulatory and legal rights and obligations under which the Partnership operates also require the Partnership to refund to the AESO financial liabilities that were received in the Partnership's tariffs that are greater than its actual expenses.

Property, plant, and equipment

Property, plant, and equipment are carried at cost less accumulated depreciation, disallowed capital costs, and impairments. The initial cost of an asset consists of its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, and for qualifying assets, the weighted average borrowing costs that are eligible to be recovered over the estimated useful life of the asset. The Partnership capitalizes major replacements and upgrades including site preparation if the related costs extend the lives of the assets and the Partnership expects to use these items for more than one year. Maintenance and repair costs are recognized as expenses in the period in which they are incurred.

Depreciation is calculated over the estimated useful lives of assets on a straight-line basis based on depreciation studies prepared by an independent expert and approved by the AUC. The expected useful lives of the assets are reviewed annually, and if necessary, changes in useful lives are accounted for in the period the changes were identified.

When an asset is retired or disposed of in the normal course of business, the gain or loss is recognized immediately in the statement of comprehensive income. Generally, losses or gains are recoverable from or repayable to the AESO through future transmission tariffs. The Partnership also recognizes the related amounts in revenue and records the amount as financial assets or liabilities related to regulated activities. Capital inventory and land are capitalized but not depreciated. CWIP is capitalized but not depreciated until the assets are available for use and the costs have been transferred to lines, substations, and buildings and equipment.

Reviews of property, plant, and equipment to establish whether there has been any impairment are carried out when a change in circumstance is identified that indicates an asset might be impaired.

Short-term and long-term debt

Short-term and long-term debt are measured initially at fair value and subsequently at amortized cost. Costs incurred to arrange long-term debt financing are offset against the debt amount and amortized using the effective interest rate method. The amortization of these charges is included in finance costs.

4. Adoption of new and revised accounting standards

Amendments to standards effective on January 1, 2024

The International Accounting Standards Board (IASB) issued two amendments to *IAS 1 Presentation of Financial Statements*, effective January 1, 2024, related to the classification of liabilities as current and non-current. Under existing IAS 1 requirements, for classifying a liability as current or non-current, a liability is current if the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. With the introduction of the two amendments, the IASB has removed that this right be unconditional and introduced that this right must have substance and exist at the end of the reporting period and the classification of the liability is unaffected by the likelihood that the company will exercise that right. In addition, the amendments specify that if a company is required to comply with covenants on or before the end of the reporting period, compliance with these covenants will affect whether such a right exists at the end of the reporting period. These amendments do not have any impact on the Partnership's financial statements or disclosures as the Partnership does not have the right to defer settlement of its liabilities, and is in compliance with covenants related to its debt.

5. Risk management and financial instruments

Fair value of financial instruments

Financial Instrument	Designated Category	Measurement Basis	Associated Risks	Fair Value at September 30, 2024
Cash	Fair value through profit or loss	Fair value	 Market Credit 	Carrying value is fair value due to short-term nature.
Trade and other receivables and other non-current assets [note 6]	Amortized cost	Initially at fair value and subsequently at amortized cost	· Credit · Liquidity	Amortized cost or carrying value approximates fair value due to nature of the asset.
Trade and other payables and other non-current liabilities [note 10]	Amortized cost	Initially at fair value and subsequently at amortized cost	• Liquidity	Amortized cost or carrying value approximates fair value due to nature of the liability.
Commercial paper and bank credit facilities and long-term debt [note 11]	Amortized cost	Initially at fair value and subsequently at amortized cost	· Market · Liquidity	\$4,871.4 million. Due to the short-term nature of commercial paper and bank credit facilities, carrying value approximates fair value. Long-term debt fair values are determined using quoted market prices (which are classified as level 1 inputs).
Lease liabilities [note 13]	Amortized cost	Initially at fair value and subsequently at amortized cost	 Liquidity Market 	Amortized cost approximates fair value due to nature of the liability.
Third party deposits [note 9]	Amortized cost	Initially at fair value and subsequently at amortized cost	 Market Credit Liquidity 	Carrying value approximates fair value as cash received is held in short-term investments.
Third party deposits liability [note 9]	Amortized cost	Initially at fair value and subsequently at amortized cost	• Liquidity	Carrying value approximates fair value due to the nature of the liability.

The Partnership currently does not use hedges or other derivative financial instruments in its operations.

Credit risk

Credit risk is the risk that a contracting entity will not complete its obligations under a financial instrument and cause the Partnership to incur a financial loss. There is exposure to credit risk on all financial assets included in the statement of financial position. To help manage this risk:

- The Partnership has a policy for establishing credit limits;
- Collateral may be required where appropriate; and
- Exposure to individual entities is managed through a system of credit limits.

The Partnership has a concentration of credit risk, as approximately 98% of its trade receivable balance at September 30, 2024 is due from the AESO (December 31, 2023 – approximately 99%). The credit risk is mitigated by the fact that the AESO is an "AA-" rated entity by Standard & Poor's, and it was established under the EUA, while the remaining trade receivables are mostly due from investment grade utilities, comprised mainly of amounts due for construction services and tower and land rents.

More than 99% of the trade receivables balance at September 30, 2024 is with third parties that the Partnership has been transacting with for over five years (December 31, 2023 – more than 99%). None of these balances are considered credit-impaired at the reporting date.

The Partnership's maximum exposure to credit risk, without taking into account collateral held, equals the current carrying values of cash, trade and other receivables, other non-current assets due from the AESO and third party deposits as disclosed in these consolidated financial statements.

Market risk

Market risk is the risk that the fair value of future cash flows of financial instruments will fluctuate because of changes in market prices. Components of market risk to which the Partnership is exposed are discussed below:

Interest rate risk

To manage interest rate risk, the Partnership controls the proportion of floating rate debt relative to fixed rate debt. In addition, the Partnership maintains access to diverse sources of funding under its established capital markets platform.

It is the Partnership's practice to finance substantially all its debt requirements with long-term debt securities for which interest rates are fixed during the entire term of each security, generally ranging from 5 to 50 years from the date of issue. To manage short-term liquidity requirements, the Partnership established bank credit facilities under which interest rates may vary daily unless the Partnership elects to issue Term Canadian Overnight Repo Rate Average (CORRA) Loans, Daily Compounded CORRA Loans or commercial paper under which interest rates are fixed during the entire term, typically ranging from 7 to 90 days from the date of issue. It is the Partnership's practice to issue commercial paper for substantially all its short-term funding requirements.

The Partnership is not exposed to interest rate risk on new long-term debt issues. This risk is managed through the longterm debt deferral account, which protects the Partnership against interest rate forecast risk on new long-term debt issues. Volume risk on new long-term debt issuance is managed through the direct assign capital deferral account. For short-term debt, the Partnership is at risk for increases in interest rates above the rate approved by the AUC and any volume variances not caused by changes in direct assign capital expenditures.

Foreign exchange risk

The Partnership does not have a significant exposure to foreign exchange risk.

Liquidity risk

Liquidity risk includes the risk that, as a result of the Partnership's operational liquidity requirements:

- It may not have sufficient funds to settle a transaction on the due date;
- It may be forced to sell financial assets below their fair market value; and
- It may be unable to settle or recover a financial asset.

To manage this risk, the Partnership has readily accessible standby credit facilities and other funding arrangements in place; generally uses financial instruments that are tradable in highly liquid markets; and has a liquidity portfolio structure wherein surplus funds are invested in highly liquid financial instruments. See note 11 - Debt for a maturity analysis.

Capital risk management

In managing its capital structure, the Partnership includes partners' capital, retained earnings and short-term and long-term debt in the definition of capital.

The Partnership manages its capital structure to reduce the cost of debt capital for customers and to safeguard its ability to continue as a going concern. In order to maintain or adjust the capital structure, the Partnership may pay distributions to partners, return capital to partners or request additional contributions from partners. The Partnership reduces refinancing risk by diversifying the maturity dates of its debt obligations.

Summary of capital structure

	As at								
	September 30, 2024				December 31,	2023			
		(millions) %			(millions)	%			
Commercial paper and bank credit facilities	\$	176.5	2.0	\$	129.0	1.5			
Long-term debt maturing in less than one year		_	_		350.0	4.0			
Long-term debt (before netting deferred financing fees)		4,720.5	54.0		4,395.3	50.9			
AltaLink, L.P. capital		2,130.5	24.4		2,130.6	24.6			
Non-controlling interests		16.5	0.2		16.5	0.2			
Retained earnings and accumulated other comprehensive income		1,696.8	19.4		1,622.3	18.8			
	\$	8,740.8	100.0	\$	8,643.7	100.0			

The Partnership is subject to externally imposed capitalization requirements under its Master Trust Indenture and the bank credit facilities. These agreements limit the amount of debt that can be incurred to 75% of total capitalization. The Partnership was in compliance with these requirements as at September 30, 2024 and December 31, 2023.

6. Trade and other receivables and other non-current assets

	As at

Trade receivables	\$	166,336	\$	152,713		
Prepaid expenses and deposits		31,637		16,566		
Cancelled projects		1,362		1,362		
Current financial assets related to regulated activities		33,692		18,973		
Total trade and other receivables	\$	233,027	\$	189,614		
CWIP-in-rate base and related income tax receivable	\$	227,159	\$	231,575		
Recovery of deemed future income taxes		774,201		715,405		
Cancelled projects		560		293		
Other non-current financial assets related to regulated activities		343,829		329,773		
Total other non-current assets	\$	1,345,749	\$	1,277,046		

Trade receivables as at September 30, 2024 include \$162.5 million due from the AESO for the August and September portion of the transmission tariffs and the difference between recognized revenue and approved interim tariffs for the period (December 31, 2023 – \$150.9 million).

Financial assets related to regulated activities include amounts that have been added to rate base for regulatory purposes, which will be recovered or repaid in tariff revenue over a time period, as approved by the AUC. Financial assets related to regulated activities also include the accrued recovery of deemed future income taxes which is based on the underlying right of the Partnership to earn an after-tax rate of return. Other non-current assets are comprised of financial assets related to regulated activities.

1. Lines – transmission lines and related equipment.

2. Substations – substation and telecontrol equipment.

3. Buildings & equipment – office buildings, leasehold improvements, leased assets, vehicles, tools and instruments, office furniture, telephone and related equipment, computer hardware and emergency capital spare parts. Leased assets relate to five building leases with an average remaining lease term of 13.9 years and net book value of \$33.5 million as at September 30, 2024 (December 31, 2023 – \$34.3 million); there were \$1.1 million additions to the cost of the leased assets during the nine months ended September 30, 2024 (December 31, 2023 – \$nil).

- 4. Land & CWIP land, capitalized inventory and CWIP. CWIP is reclassified to the appropriate asset classes when the assets are available for use.
- 5. On July 31, 2024, the AUC did not approve the capitalization of \$18.5 million of costs related to the 2023 spring wildfire and snow events, but approved, on a placeholder basis, the recovery of those costs through the self-insurance reserve.

9. Third party deposits

	Adva	outions in ance of cruction	Maint	ting and enance n Advance	Total

Recognized other revenue		_		(137)		(137)	
As at September 30, 2024	\$	63,712	\$	6,455	\$	70,167	

Third party deposits are held in short-term investments, which are reinvested as needed. These investments earned a weighted average annual effective interest rate of 4.18% as at September 30, 2024 (December 31, 2023 – 5.09%). For contributions in advance of construction, all interest is credited to the specific customer.

10. Trade and other payables and other non-current liabilities

	As at						
	Septe	September 30,					
	2	2024	2	2023			
(in thousands of dollars)							
Trade and accrued payables	\$	64,634	\$	59,003			
Accrued interest on debt		58,132		48,145			
Other current liabilities		7,005		8,200			
Current financial liabilities related to regulated activities		6,710		6,154			
Total trade and other payables	\$	136,481	\$	121,502			
Accrued employment benefit liabilities	\$	9,910	\$	9,689			
Other long-term liabilities		5,677		5,270			
Non-current financial liabilities related to regulated activities		3,399		3,379			
Financial (redemption) liabilities		16,498		16,459			
Total other non-current liabilities	\$	35,484	\$	34,797			

Financial liabilities related to regulated activities include accruals for the repayment of deferral account balances which are certain costs that were incurred by the Partnership relating to its primary activities with the AESO that are less than what was received in tariffs.

Piikani Transmission Holding Limited Partnership (the nominee of the Piikani Nation) and 1759511 Alberta Ltd. (the nominee of the Kainai-Blood Tribe) have put options to sell all their units in PLP and KLP, respectively, to AltaLink at any time, subject to regulatory approvals from the AUC. To reflect the put options of Piikani Transmission Holding Limited Partnership and 1759511 Alberta Ltd., the Partnership recognizes a financial (redemption) liability and reduces AltaLink partners' capital in these consolidated financial statements. The valuation of the purchase price on the put options are defined in the partnership agreements and are calculated as the net regulatory book value of long-term assets less the book value of long-term debt on the put option exercise date.

11. Debt

	\$ 725,000	\$ _	\$ 129,000	\$ 1,084	\$ 594,916	

The \$500.0 million revolving bank credit facility provides support for the borrowing under the unsecured commercial paper program and may also be used for operating expenses, capital expenditures, working capital needs, and for general corporate purposes including the payment of distributions. Drawdowns under this facility may be in the form of Canadian prime rate loans, Term CORRA Loans or Daily Compounded CORRA Loans.

The \$75.0 million revolving bank credit facility may be used for operating expenses, capital expenditures, working capital needs, and for general corporate purposes including the payment of distributions. Drawdowns under this facility may be in the form of Canadian prime rate loans, Term CORRA Loans, Daily Compounded CORRA Loans or drawn letters of credit.

On an annual basis, the Partnership can request the lenders' consent that the maturity date of the credit facilities be extended for a further 365 days.

The \$150.0 million inter-affiliate revolving credit facility provided by AltaLink Investments, L.P. may be used for operating expenses, capital expenditures, working capital needs, and for general corporate purposes including the payment of distributions. Drawdowns under this facility may be in the form of Canadian prime rate loans.

On October 31, 2023, AltaLink entered into a credit agreement with the Canada Infrastructure Bank to provide debt financing for up to 50% of eligible costs on AltaLink's Central East Transfer-Out Project, Southeast Development and Southwest Development Projects. Total borrowing under the credit facility is capped at \$604.3 million with a final maturity date of December 31, 2065. All borrowings under the credit facility are subject to a fixed repayment schedule. On October 18, 2024, the AUC approved the credit facility. AltaLink expects its first drawdown under the credit facility will be in the first quarter of 2025.

The Partnership uses the proceeds from the issuance of Senior Debt obligations to repay commercial paper and indebtedness outstanding under the Partnership's credit facilities and maturing Senior Debt obligations, to finance the capital construction program, and for general corporate purposes.

On May 22, 2024, AltaLink issued \$325.0 million of 4.742% 30-year Series 2024-1 Senior Secured Notes due May 22, 2054, and on June 6, 2024, repaid \$350.0 million of maturing 3.399% 10-year Series 2014-1 Medium-Term Notes.

On October 11, 2023, AltaLink issued \$500.0 million of 5.463% 32-year Series 2023-1 Senior Secured Notes due October 11, 2055, and on November 6, 2023, repaid \$500.0 million of maturing 3.668% 10-year Series 2013-4 Medium-Term Notes.

The Senior Debt obligations are secured obligations and rank pari passu with all existing and future senior indebtedness, and ahead of all subordinated indebtedness of the Partnership. Collateral for the Senior Debt obligations consist of a first floating charge security interest on the Partnership's present and future assets. The bank credit facilities rank equally with Senior Debt and all future senior secured indebtedness that is issued by the Partnership.

Senior Term Debt is redeemable by the Partnership at the greater of (i) the prevailing Government of Canada bond yield plus a pre-determined premium, and (ii) the face amount of the debt to be redeemed plus, in each case, accrued and unpaid interest to the date of redemption. The Partnership has no current plans to redeem any of its long-term debt prior to maturity. Certain of the AltaLink debt instruments have a provision which allows for redemption at the face amount, either three or six months before maturity.

Cost reimbursements paid or payable	\$	46	\$	135	\$	104	\$	876	

AltaLink Management Ltd. employs all staff who provide administrative and operational services to the Partnership on a cost reimbursement basis. The Partnership has indemnified AltaLink Management Ltd. for all associated expenses and liabilities.

The Partnership has an accrued balance for employee compensation and benefits of 24.6 million as at September 30, 2024 (December 31, 2023 – 24.9 million).

Cost recovery revenue for non-regulated activities includes services provided to AltaLink Investments, L.P., AltaLink Investment Management Ltd., AltaLink Holdings, L.P., BHE Altalink Ltd., BHE Canada, L.P., BHE Canada Limited, BHE Canada Holdings Corporation, MATL Canada L.P., and Berkshire Hathaway Energy Company.

During the nine months ended September 30, 2024, the Partnership incurred costs of \$0.1 million paid or payable to Berkshire Hathaway Energy Company as cost reimbursements for third party charges (September 30, 2023 – \$0.9 million).

AltaLink has a \$150.0 million inter-affiliate revolving credit facility from its limited partner, AltaLink Investments, L.P., with \$nil drawn on this facility as at September 30, 2024.

15. Revenue from operations

On February 12, 2024, the AUC issued Decision 28174-D01-2024 with respect to AltaLink's 2024-2025 GTA, approving the negotiated settlement agreement as filed. On June 19, 2024, the AUC issued Decision 28174-D02-2024 with respect to AltaLink's 2024-2025 GTA, providing its reasons for the approval of the negotiated settlement and its findings on the matters excluded from the negotiated settlement. The AUC approved certain components of the wildfire mitigation plan, actual salvage expenditures for 2019-2021 and the 2022-2025 salvage expenditures. The AUC also approved AltaLink's transition to the capitalization of site preparation or salvage costs for replacement projects starting in 2024. AltaLink filed a compliance filing to reflect the directions from the AUC on August 12, 2024. In its compliance filing, AltaLink adjusted the 8.50% return on equity included in its application filed on December 19, 2023, to the 9.28% return on equity for 2024 as approved by the AUC, and as a placeholder for 2025. AltaLink also commenced capitalization of salvage costs as part of the previously approved salvage methodology. AltaLink's total revised revenue requirements adjusted for the negotiated settlement is \$902.5 million for 2024, which includes KLP and PLP.

The compliance filing proceeding is expected to be completed in October 2024, and a final decision is expected by the end of this year.

On December 1, 2023, the AUC approved 2024 interim refundable transmission tariffs for AltaLink, including monthly tariffs for PLP and KLP, of \$73.6 million per month effective January 1, 2024.

On August 17, 2022, the AUC approved AltaLink's 2023 revenue requirement at \$875.0 million, with total approved 2023 revenue requirement, including PLP and KLP, of \$883.0 million.

On March 31, 2022, the AUC issued Decision 27084-D01-2022 approving an equity return of 8.5% and an equity ratio of 37% for 2023. On October 9, 2023, the AUC issued its decision on the generic cost of capital (GCOC) for 2024 and beyond for Alberta's regulated electric and gas utilities, approving a set equity ratio and a formula to determine return on equity. The AUC set the deemed equity ratio of 37% and set a notional return on equity of 9.00%, which is subject to formulaic adjustments using 30-year Government of Canada bond yields and Canadian utility spreads. On November 20, 2023, under the approved formula, the AUC issued an order approving 9.28% as the final return on equity for 2024 for the Alberta utilities.

For the nine months ended September 30, 2024, approximately 96% of the Partnership's revenue is attributable to the AESO (September 30, 2023 – approximately 96%).

1. The nine months of 2024 is based on the compliance filing filed with the AUC on August 12, 2024. The nine months of 2023 is based on the revenue requirement approved on August 17, 2022.

2. On July 31, 2024, the AUC approved the recovery of \$18.5 million of 2023 spring wildfire and snow restoration expenses through the self-insurance reserve.

3. The Partnership included adjustments to recognize differences in accounting treatment for International Financial Reporting Standards (IFRS) purposes, compared to regulatory purposes, as shown in more detail in the table below.

	\$ 40,845	\$	29,564	\$	82,364	\$	81,128	

Property taxes, salvage, and other expenses

The property taxes, salvage, and other expenses in the table above do not have an impact on net income because they are fully recovered in tariff revenue (note 15 - Revenue from operations).

18. Non-controlling interests

AltaLink holds 49% interests in two partially-owned subsidiaries, KLP and PLP, which are also transmission facility owners operated by the General Partner. These subsidiaries were formed to jointly hold the Southwest 240 kilovolt regulated transmission assets located on First Nations Reserve lands with local First Nation partners.

As at September 30, 2024, the non-controlling interests within the equity section of the statement of financial position are comprised of 1759511 Alberta Ltd.'s (the nominee of the Kainai-Blood Tribe) \$6.6 million limited partner interest (December 31, 2023 – \$6.6 million) or 51% of KLP, and Piikani Transmission Holding Limited Partnership's (the nominee of the Piikani Nation) \$9.9 million limited partner interest (December 31, 2023 – \$9.9 million) or 51% of PLP.

19. Commitments

The contractual commitments of the Partnership associated with the construction of new facilities as at September 30, 2024 are \$164.5 million (December 31, 2023 – \$140.1 million). Of these commitments, approximately 95% of the future undiscounted payments occur by December 31, 2026.

20. Contingencies

The Partnership is subject to legal proceedings, investigations, assessments, and claims in the ordinary course of business, including the following:

- AltaLink has been sued by third parties who seek compensation for damages in respect of certain operating, capital or other activities performed by AltaLink or its contractors.
- The Partnership has found instances of equipment, engineering or construction deficiencies following acceptance and energization of some assets. Claims processes are in place to seek recovery for such deficiencies.

At this time, in the opinion of management, the contingencies are dependent on future legal proceeding results and the likely outcomes are not determinable.
