

**NOTES**

AltaLink is proposing to rebuild the transmission line along the existing alignment for most of the project. There are seven sections of the line, shown as A (A1-A100), B (B1-B80), F (B80-C1), C (C1-C40), G (C40-D1), D (D1-D100) and E (E1-E20) that AltaLink will file an application with the Alberta Utilities Commission. AltaLink is completing additional work on the 799L transmission line (shown in purple on the included maps) in the area.

AltaLink is also proposing a potential Alternate Route Segment, which is shown in green near the South Mayerthorpe 443S Substation. If approved by the Alberta Utilities Commission, only one route segment will be built (i.e., either B10-B30 or B10-B25-B30).

**How to read your map:**

This map will help you locate the proposed rebuild for the transmission line in relation to your property. The point designations, black dots with corresponding red letters and numbers (for example A1), will assist to identify different features such as start or end points. They are also noted on the strip map for that area.
