Helicopter activity near you

You are receiving this notification because you are near upcoming helicopter work as part of the Central East Transfer-Out (CETO) project and we want to ensure you are informed of what you might see and hear.

Project details

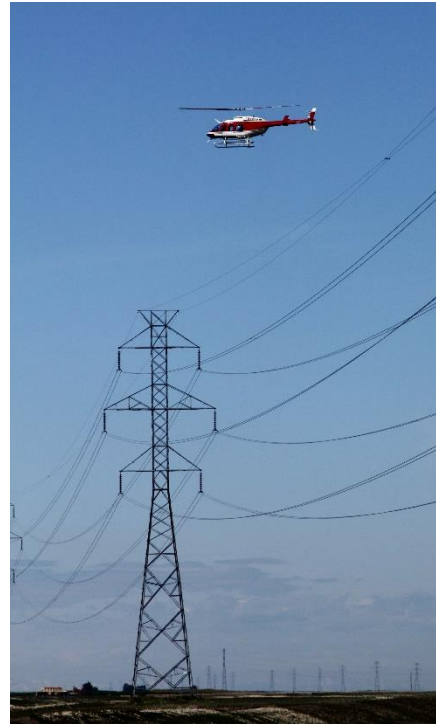

Starting mid-February and continuing into April, you may see a helicopter in your area performing conductor (wire) stringing and hanging markers and hardware along the CETO transmission line as part of the construction process.

The helicopter work will start east of Highway 601 near Highway 11 and continue west towards Range Road 252 east of Joffre along Township Road 392.

What you can expect

The helicopter will be flying during daylight hours only and activity will be weather permitting.

When using helicopters for transmission line construction, AltaLink is mindful to minimize disruption to residences, area users, livestock and wildlife. We follow permits and guidelines from local authorities and regulatory agencies, and we only use approved landing sites and refueling locations.

Please note that helicopter work on the CETO project may resume in the summer or fall.

Contact us

We are available to address any questions or concerns you may have. Please contact Serge Laforest at 403-461-1749 or serge.laforest@altalink.ca, or Curtis Kaufman at 780-212-3529 or curtis.kaufman@high-voltage.ca if Serge is unavailable.

For more information about the CETO project, please visit www.altalink.ca/projects.

Sincerely,

Serge Laforest
Senior Right of Way Access Coordinator
