# 202L Capacity Restoration Project Notice of application filing and approval

Thank you for your ongoing participation in the 202L Capacity Restoration Project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on July 17, 2024, and received approval for the project on July 24, 2024.

### Next steps

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

We plan to begin construction sometime in August 2024 and anticipate it will take approximately one week to complete.

Depending on where you are in relation to the project, you may see or hear:

- Noise and construction crews
- Transmission structure modifications or replacements

### AUC approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The Permit and Licence for this project can be viewed on the AUC website at: https://www2.auc.ab.ca/Proceeding29161/SitePages/Home.aspx

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

If you have any issues accessing the project Permit and Licence, please contact us at the details below and we will mail copies of these documents to you.

#### **Project background**

AltaLink's approved project is located within Yellowhead County, approximately 40 kilometres southeast of the Town of Edson.

The project will involve minor equipment modifications and structure replacements for up to five structures on AltaLink's existing 202L transmission line. The equipment modifications will involve replacing hardware on the required structures.

Selected structures will also be replaced with new structures that are similar in appearance. The existing structures are between 15 and 17 metres tall, and the new structures will be between 18 and 20 metres tall.

These modifications will ensure sufficient clearance from the ground or other objects and enable the safe operation of the line at its designed capacity.

# Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at https://www.altalink.ca/project/202l-capacity-restoration-project/.

Sincerely,

Kris Gladue

Manager, Stakeholder Engagement
