190L and 903L Transmission Line Structure Replacements Notice of application filing and approval

Thank you for your ongoing participation in the 190L and 903L Transmission Line Structure Replacements project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on January 9, 2025. The AUC approved this project for construction on January 16, 2025.

Next steps

We plan to begin construction in late January 2025 and anticipate construction to be complete at the end of February 2025.

Depending on where you are in relation to the project, you may see or hear:

- Noise and construction crews
- Right-of-way and construction preparation
- Transmission structure construction
- Wire stringing on transmission structures

AUC Approval

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC website at:
<https://www2.auc.ab.ca/Proceeding29772/SitePages/ViewDispositions.aspx>

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

Once your account has been created and you have successfully logged in, enter Filing number "29772" into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "190L and 903L" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink is proposing to replace two existing structures with two new structures. The new structures will be approximately 50 metres south of the existing structure locations.

The existing structures are steel lattice structures that are approximately 27 metres tall. The new structures will be steel H-frame structures and will be approximately 28 metres tall. Additional right-of-way will not be required for the new structures.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/project/190l-and-903l-transmission-line-structure-replacements/>.

Sincerely,

Kris Gladue
